

Moisture, Humidity & Oxygen Instrumentation

June 13, 2007

**EdgeTech announces the release of their
new oxygen transmitter called the
OxyTrans**

- ◆ The OxyTrans is a 2 wire loop powered 4-20mA transmitter and can be used for on-line or in-line applications.
- ◆ Five different O₂ measurement ranges are offered covering trace and % levels.
- ◆ The OxyTrans uses an electro-chemical sensor which is insensitive to other gases present in the process.
- ◆ The OxyTrans features an LCD display with a bar graph, an IP65 enclosure, a stainless steel cell block and one point calibration adjustment when in the field or in the lab.
- ◆ The OxyTrans is low-cost, easy to install and ready to use.
