DEFINITIONS

End of Life (EOL)	The end-of-life (EOL) process determines when a product is obsolete / discontinued. Once obsolete, the Product is not sold, maintained, or supported.
Last Date To Order (LDTO)	The Last Date to accept an order. No new orders will be accepted after that date.

Last Date of Support (LDOS)	The last date to receive support. This date maybe fluid depending on part availability and operational life of EdgeTech's internal test fixtures such as the Hydrophone calibration tank. EdgeTech has purchased enough parts based on previous repair history to support BATS customers for a few years.
Obsolete / Discontinued	Once a product has been deemed obsolete or discontinued it is no longer sold, maintained or supported.
